PROFESSIONAL SUMMARY

Senior Frontend Developer with 7+ years of experience building web applications in fintech, banking and AI products, mainly with **React, Next.js and TypeScript**. Has owned complex products from initial architecture through maintenance and refactoring. Currently the sole frontend developer on two data dashboard platforms.

Experienced in state management, performance optimization, automated testing (Jest, Cypress), microfrontends and accessibility. Uses **Claude AI** and **Claude Code** in daily development and has working knowledge of **Power BI** and data analysis. Self-taught, and comfortable working independently or in cross-functional teams.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, React Native, Vite, Zustand, Redux, React Query, Axios, Material UI (MUI), Emotion, Styled Components, CSS, Sass, Web Workers

Testing & QA: Jest, Cypress, Mockoon, Postman

Code Quality & Tooling: ESLint, Prettier, Knip, large-scale refactoring

Backend: Node.js, Express, MongoDB

AI Tools: Claude AI (prompt engineering, agentic workflows, API integration), Claude Code, Model Context Protocol (MCP), Google Gemini, LLMs, generative AI, AI governance

Data: Python (basic), Power BI (dashboards, data visualization), data analytics, data science fundamentals

Practices: Agile / Scrum, microfrontend architecture, accessibility (WCAG), API integration, performance optimization, API contract design, data dashboards and tables

EXPERIENCE

GlobalLogic | Senior Frontend Developer

Jun 2026 - Present

Sole frontend developer on two data applications: an interactive dashboard built around dynamic tables, and a monitoring dashboard. Responsible for architecture, code quality and delivery of both.

- Own the frontend of both applications as the only frontend developer, after the team scaled down.
- Led a large refactor that removed **20% of the application's code** (dead code), leaving a smaller and easier to maintain codebase.
- Migrated the data layer from adapters to **React Query** hooks, simplifying fetching, caching and state synchronization.
- Migrated global state from Context to **Redux**.
- Set up and maintain **Knip, Prettier and ESLint** to keep standards consistent across the codebase.
- Took part in the full development of a new feature, delivered on time, and defined the **API contract** together with the backend team.

Stack: React, Vite, TypeScript, React Query, Redux, MUI, Knip, Prettier, ESLint

GlobalLogic | Frontend Developer *Mar 2023 - Apr 2026*

Lead frontend engineer on a large-scale AI-powered SaaS platform. Responsible for the full lifecycle of the frontend, from initial architecture design through feature delivery, ongoing refactoring, testing strategy, and sustained long-term maintenance.

- Owned **end-to-end frontend architecture** across the full product lifecycle: planning, implementation, iterative refactoring, and sustained delivery under evolving requirements.
- Built complex UI workflows and stateful business logic using **React, TypeScript, Zustand, React Query, and Vite**, with custom API orchestration layers for LLM output handling.
- **Led multiple major refactors** to improve rendering performance, state consistency, and long-term maintainability as the product matured.
- Designed resilient data handling strategies for frequently changing backend structures and generative AI outputs.
- Defined Jest unit testing strategy and drove Cypress end-to-end test adoption.
- Coordinated closely with backend and ML teams on API contract evolution and model behavior integration.
- Completed formal training in LLMs, Agentic Systems, and Generative AI; applies **Claude AI** actively in day-to-day development workflows.

Stack: React, TypeScript, Next.js, Vite, Zustand, React Query, Axios, Jest, Cypress, Emotion, Mockoon, Postman

Santander Tecnologia | Frontend Developer *Nov 2021 - Mar 2023*

- Developed **Next.js microfrontends** for the Help Center and online appointment scheduling, integrated across multiple product teams.
- Implemented and enforced accessibility standards (WCAG) and UI consistency across distributed frontend teams.
- Built native mobile features using **React Native** integrated with Salesforce.
- Led research and full migration of a legacy .NET 4.6 kiosk application to **Next.js**.
- Documented legacy SQL data structures to support future integration and migration efforts.

GlobalLogic | Frontend Developer *Aug 2020 - Nov 2021*

- Developed a high-traffic Progressive Web App (**PWA**) for a digital wallet product using React, TypeScript, and Jest.
- Acted as lead developer for multiple key product features within a 30-person Agile team.

NUCBA | Fullstack Instructor *Aug 2020 - May 2022*

- Taught HTML, CSS, JavaScript, Node.js, Express, and MongoDB to cohorts of aspiring developers.
- Designed curriculum materials and mentored students through full project development cycles.

Accenture | Frontend Developer *Sep 2019 - Aug 2020*

- Built **React microfrontends** for a large-scale banking platform within an international, 20+ person Agile team.
- Delivered a government microsite as sole frontend developer.
- Contributed to an international mortgage emergency tools project.

Freelance & Media Production | Video Editor / Photographer / Camera Operator *2008 - 2019*

Video editing for broadcast TV; QC technician in public media; freelance photography and camera operation.

EDUCATION AND CONTINUOUS LEARNING

2026: Data Science I: Fundamentos para la Ciencia de Datos, Coderhouse (20 h)
2026: Data Analytics, Coderhouse (20 h)
2026: AI 204b: GL Certified AI Professional - Claude Code, GlobalLogic (14 h)
2026: AI 101: GL Certified AI Associate - Developers, GlobalLogic (7 h)
2021: Frontend Development, ADA ITW
2019: Professional Webmaster, UTN
Coursework: Programming and AI Studies, Universidad Siglo XXI (2 years)
2008: Image and Sound Design, FADU-UBA

CERTIFICATIONS

Anthropic, 2026

- **AI Fluency: Framework & Foundations** (4 h) · *AI fluency, responsible use of AI*
- **Claude Code 101** (1.5 h) · *Claude Code, agentic coding*
- **Claude Code in Action** (1 h) · *Claude Code, AI-assisted development workflows*
- **Introduction to Model Context Protocol** (1 h) · *MCP, LLM tool integration*

Udemy, 2026

- **React JS: Build 6 Real-World React Apps with AI Integration** (14 h) · *React, AI integration*
- **Claude Code Beginner to Pro: Agentic Coding for Developers** (5.5 h) · *Claude Code, agentic coding*
- **Mastering GenAI: Fine-Tune & Adapt LLMs Effectively** (1 h) · *LLMs, fine-tuning, generative AI*

LinkedIn Learning, 2026

- **React: Web Workers** (1 h 21 min) · *web development, JavaScript, shared memory*
- **Introduction to Artificial Intelligence** (2 h 26 min) · *artificial intelligence*
- **Introduction to AI Governance** (59 min) · *data governance, responsible AI*
- **Fundamentals of Agentic AI: Business Implications and Ethical Insights** (33 min) · *intelligent agents, AI for business*
- **Introduction to Prompt Engineering for Generative AI** (1 h 3 min) · *prompt engineering, AI prompts*
- **Top Ten AI Prompts** (1 h 43 min) · *AI prompts, AI productivity*
- **Aprende Gemini, la IA de Google** (1 h 25 min) · *Google Gemini*
